

Mathematics

Collect some different fruits/ vegetables. Can you investigate how heavy they are? Can you predict which one is going to be the heaviest and lightest? Can you weigh them using some scales and put them in order starting with the heaviest? Did you predict correctly?

Choose one of your toys - perhaps you could choose a figure or a doll. Can you find something that is taller or shorter than your figure/doll. Perhaps you can measure how tall it is. You could use blocks or could even use a ruler. What other things could you measure around your house? You could measure with a ruler or tape measure or you could use your handspan if you don't have one. If you have grown sunflowers or beanstalks maybe you could measure them and see how tall they have grown. Maybe you could measure your family and find out who is the tallest and who is the shortest?

Can you create a repeating pattern using some fruit and vegetables? Perhaps you could do some printing with vegetables or some other objects. Can you make a 3 step repeating pattern? Or perhaps your pattern could have two elements - e.g. colour and shape (red apple, green pear, red apple, green pear).

We Are Storytellers

So as we are all still at learning at home we are sending you some new challenges to keep going. We know and understand it is really tricky at home, but keep going you are doing an amazing job. The most important thing is to remember to try and do at least a little bit of learning each day. Most important of all is to keep reading every day and recapping on those phonemes and tricky words so you don't forget them.

If we were in school our topic this term would be We Are Storytellers. As well as reading lots of lovely traditional stories this half term, our focus text would have been the story -

Supertato

Please keep sending us lots of photographs of your home learning to your class email address.

Class1homelearningselfie@forefieldinfant.sefton.school

Class2homelearningselfie@forefieldinfant.sefton.school

Class3homelearningselfie@forefieldinfant.sefton.school

Please adapt and support your child as much or little as you feel they need. Work can be completed on paper or practically. Don't feel you need to print out sheets from the website - these can just be used as ideas and starters for your discussion and as ways to record in your Homework books.

Literacy

Read the story of Supertato. If you don't have your own, we have uploaded one to our home learning page.

Complete a story map for Supertato-drawing or writing about the different parts of the story. We have put some templates on the website you can print off or copy into your book to help you.

Can you create a comic strip (pictures/written) telling the Supertato story? If you are looking for an extra challenge perhaps you can make up a different story about the adventures of Supertato and the Evil Pea! You could even create a different evil character.

Can you create a wanted poster for the Evil Pea? We have a template on our website for you to copy or print off. Tell everybody how to spot Evil Pea. Don't forget to use some super describing words to tell everybody what he looks like so they can easily spot him if he sneaks into their home.

Physical	Personal, Social & Emotional	Expressive Arts & Design	Understanding the World
<p>The tweezer challenge! Have you got any Frozen peas in your freezer? Have you got some tweezers too? - Use the tweezers to put a different amount of peas in different containers. Maybe you could use a timer to see who can do it the quickest.</p> <p>Can you make a jelly just like in the story to trap Evil Pea? You could try different jelly flavours and see which one is your favourite.</p> <p>Create a super hero assault course outside. Can you keep Supertato super fit? Will you climb over, under, through? Will you tiptoe, jump, crawl? Don't forget to send your photos/videos our way. Maybe you could time yourself. I wonder who is the fittest superhero in your family. Maybe you could make some medals, for 1st, 2nd, 3rd, 4th</p>	<p>How can we be heroes? Who can we help? Think about all the Rainbow Key workers. How are they helping us at the moment?</p> <p>Talk with your family members about other people who help us. How and why do they help us? Do they help us in the same or different ways?</p> <p>Would you forgive Evil Pea? Discuss forgiveness with your grown up. What does this mean? What can we do if we haven't made a sensible choice?</p> <p>Talk about our Golden Rules in school. Which Golden rules did the Evil Pea break? How could he be a better friend?</p>	<p>Can you devise a plan to capture the evil Pea? Can you design and then build a trap? Think about the best materials to use to make it secure. Don't forget to test it out and make sure Evil Pea cannot escape. Once you are happy with your trap send a photograph to your class teacher to enter our Evil Pea Trap Competition.</p> <p>Choose some different fruits or vegetables from your house. Look closely at their features - the colours, patterns, lines and markings. Maybe use a magnifying glass to help you see really closely. Can you draw or paint them?</p>	<p>Where do our vegetables come from? How do they grow? Do they grow above or below the ground? Can you predict what is inside the vegetables?</p> <p>Make vegetable soup/ mashed potato. Look and describe a potato before boiling- notice the changes. Make sure you have a grown up with you.</p> <p>When you are out and about look for signs of summer. What things do you notice have changed since the spring? How is summer different from other Seasons? Do you know which season will come next? Can you find out?</p> <p>Can you plant a sunflower seed in a pot in your garden? Take good care of it and make sure you find out what it needs to help it grow.</p>
